

Fire Door Systems A Guide to Code Compliance

Provider: **McKeon Door Company / Interior Tech**

Length: **1 Hour**

Credits: **1 AIA HSW CE Hour**

Description

This 1-hour seminar is structured to acquaint design teams and others, with basic building code requirements that drive the use of fire and smoke rated wide span opening protectives.

Learning Objectives

By completing this course, the design professional will be able to:

1. See the direct correlation between life safety, product application and open design by way of slides, discussion and case studies.
2. Differentiate between fire walls and fire barriers.
3. Understand the regulatory standards governing the use and application of wide span opening protectives.
4. Learn the fundamental code requirements that drive the placement of fire walls and fire barriers, their openings and their opening protectives by examining numerous case studies.
